

Learning in French, English & Spanish

Articles, biographies and information available in Spanish, English and French are linked. This promotes learning multiple languages at a young age. Articles that have English and French translations will have this at the bottom of the article so you can jump to the English version. From there you can return to the Spanish or continue onto the French.

Diccionario Visual for example, allows you to easily switch between the three languages to see the different word for one item.
